Empowering Minds, Advancing Research, and Driving Digital Innovation.

Experience Innovation, Every Day

Eagles Academic Research and ICT Hub is a leading African educational innovation organization dedicated to revolutionizing learning through Artificial Intelligence (AI), Robotics, Digital Technology, and Emerging Technologies.

We specialize in transforming complex technological concepts into practical, engaging, and curriculum-aligned learning solutions that prepare students for the rapidly evolving digital economy.

Our innovative educational resources empower learners to move beyond technology consumption and become creators, innovators, problem-solvers, and future leaders.

As Africa advances toward the Fourth Industrial Revolution, Eagles Academic Research and ICT Hub is committed to equipping young minds with the knowledge, skills, and mindset required to thrive in a technology-driven world.

Our Mission & Vision

To become Africa's premier educational technology and innovation organization, empowering future generations with the skills, creativity, and technological competencies needed to lead in the global digital economy.

To simplify Artificial Intelligence, Robotics, and emerging technologies into accessible, engaging, and practical learning experiences that inspire innovation, critical thinking, entrepreneurship, and lifelong learning among students across Africa.

Eagles AI & Robotics Kits

- Rich assemble robot forms
- APP supported with rich play mod
- Graphical and Arduino coding
- Robot competition compatible
- 18 Lessons (90-180 mins)

SKU: 1810

Empowering Minds, Advancing Research, and Driving Digital Innovation.

Eagles AI & Robotics Kits

Our practical learning kits provide hands-on experience in designing, building, programming, and operating intelligent systems

Eagles mini STEM Robot V2.0 - Education version

Specifications

	Consumer Version	Education Version
SKU	181000	181008
Mainboard	• Name: ELF mini • Microchip: Atmega 328P • Port: 4 x RJ11 (connect to RJ11 sensor and modules) 2 x DC motor port 1 x Communication Port (Bluetooth) • Electronics: 1 x Sound Sensor 1 x Light Sensor 1 x Buzzer 1 x IR Receiver 2 x Yellow LED 2 x Red LED • Power Switch: 1 x Touch Switch	• Name: ELF mini V2 • Microchip: Atmega 328P • Port: 4 x RJ11 (connect to RJ11 sensor and modules) 2 x DC motor port 1 x Communication Port (Bluetooth) • Electronics: 1 x Sound Sensor 1 x Light Sensor 1 x Buzzer 1 x IR Receiver 2 x Yellow LED 2 x Red LED • Power Indicator: 4 x Blue LED • Power Switch: 1 x Touch Switch (turn on/off robot by touching when toggle switch is off) 1 x Toggle Switch (when toggle switch is on, cannot turn off by touch switch)
Working Voltage	6-12V	3-6V
Sensor & Motor	1 x RGB IR Avoid Sensor (2 x RGB LED, 2 x Yellow LED, IR Avoid Sensor)	1 x RGB Ultrasonic Sensor (2 x RGB LED, 2 x Yellow LED, Ultrasonic Sensor)
	1 x LED Matrix Panel Module 5*14	1 x LED Matrix Panel Module 5*14
	1 x Single-way Line-following Sensor	1 x Double-way Line-following Sensor
	2 x TT Motor	2 x TT Motor
Battery	1 x 6AA Battery Holder (AA battery is not included)	1 x 14500 Lithium Battery Pack (charge by mainboard)

Home Inventor Kit (Education version)

Product Name:	Home Inventor Kit		
Main Controller:	ELF mini	Users	8+ children
Microchip:	ATmega328P	Guidance	7 Projects
Onboard Sensor and Electronic Module:	Light Sensor	Sensor and Module: Operating Voltage:	IR Remote Control
	Sound Sensor		Touch Sensor
	IR receiver		RGB Ultrasonic Sensor
	Buzzer		Temperature and Humidity Sensor
	LED x 4 (Red x2, Yellow x 2)		Red LED Module
	Touch Power Switch		5V130 Fan Module
Extension Port:	RJ11 Port x 4, Bluetooth Port x 1		LED Segment Display
Communication:	Micro USB, IR	Software:	WeeeCode Arduino IDE

Eagles Academic
Research & ICT Hub
RC2798484

Home Inventor Expansion Set

- Double-way Line-following sensor;
- Water Atomizer;
- PIR (motion) Sensor
- Flame Sensor
- Gas Sensor
- Water (raindrop) Sensor
- MP3 module
- Moisture Sensor
- Gesture Sensor
- 4 LED Button
- Water pump
- TT motors, etc

15 in 1 Intelligent Smart Home Training Kit

- Mainboad: ELF mini V3.0
- Operating Voltage: 6-12V (18650 Lithium battery pack included)
- Input Module: Light Sensor, Sound Sensor, IR remote, Touch Sensor; RGB LED Ultrasonic Sensor; Temperature and Humidity Sensor, Double-way Line-following sensor, PIR (motion) Sensor, Flame Sensor, Gas Sensor, Water (raindrop) Sensor, Moisture Sensor, Gesture Sensor, 4 LED Button
- Output Module: Buzzer; LED Module - Red; 5V130 Fan Module: 9g Servo; Segment display module; RGB LED Ultrasonic Sensor, Water Atomizer, MP3 module, TT motor, Water pump
- Switch: 1 xTouch switch (turn on/off robot when toggle switch is off)
- 1 x Toggle switch (keep robot turned on when toggle switch is on)
- Program Software: Scratch (3.0), Arduino IDE.

Eagles Jeep STEM Classroom Robot Kit (Bluetooth Version)

Microchip	AT mega328P	**Figures**	1) Replaceable microchip, support ESP32, 328P, 2560, etc; 2) Programmable RGB Ultrasonic Sensor; 3) 7 x 21 tender LED Matrix, code an animation or digital clock; 4). Sensitive line-following sensor. 5). Add 2 front wheels and accessories.
Operation Voltage	6-12V		
Motor	TT Motor * 2		
Sensors	Ultrasonic, Line-following, Light, IR, Sound, Button		
Electronic modules	RGB LED, Buzzer, LED Matrix		
Coding Software	WeeeCode (Scartch3.0) & Arduino		
Battery	18650 Lithium Battery		
Package	Plastic Box		
Tutorial	16 courses

Eagles 3-in-1 STEM Robot Kit

Main Controller:	ELF	Users	8+
Microchip:	ATmega328P (can be replaced and upgrade)	Guidance	Manual and 10 lessons
External Sensor and Electronic Module:	RGB Ultrasonic Sensor	Onboard Sensor and Electronic Module:	Buzzer
	Light Sensor		Button
	Sound Sensor		RGB LED
	IR transmitter and receiver	Motors:	TT Motor x 2
	Buzzer	Assembly Type:	3 (one on printed manual)
	7*21 LED Matrix Panel	Operating Voltage:	6V - 10V
	Line-following Sensor	Communication:	Micro USB, Bluetooth 4.1, IR
Extension Port:	RJ11 port x 4; DC motor port x 10; Pin port x6	Giveaway:	18650 battery x2 Black tape

In Stock

6 in 1 Eagles Evolution Robot Kit

In Stock

Mainboard	ELF	User	10 +
On-board Electronics	ATmega328P	Motor	2 × 188rpm DC geared Motor
	1 × Light sensor	External electronic modules	RGB ultrasonic sensor
	1 × Sound sensor		Double-way line-following sensor
	1 × IR transmitter & receiver	Variety and quantity of parts	Parts variety:55 +
	1 × Buzzer		parts quantity: 380+
	1 × On-board button	Operation voltage	6-12V
	1 × On-board RGB LED	Power supply	18650 lithium battery × 2
Extension port	4 × RJ11 port, 2 × DC motor port, 4 × Versatile motor port	Programming software	APP (graphical programming) PC (graphic + Arduino C)
	6 × pin conversion port, 1 × USB B port, 1 × Bluetooth 2.4G port	Dimension (L × W × H)	500 × 150 × 350(max.)
Communication	Micro USB, Bluetooth 4.1, IR	Net weight	1800g

Eagles 9-in-1 Science Kit

Product Name:	9-in-1 Science Kit		
Main Controller:	ELF	Users	12+
Microchip:	ATmega328P	Guidance	Manual and 10 lessons
External Sensor:	RGB LED Ultrasonic Sensor	Onboard Modules:	Buzzer
	Color Sensor		Button
	RJ11 Adapter		RGB LED
Motors:	DC Motor 25 (50RPM) x1	Assembly Type:	9
	DC Motor 25 (188RPM) x1	Operating Voltage:	6V - 10V
	DC Motor 25 (335RPM) x2	Communication:	USB Cable
Extension Port:	RJ11 port x 4; DC motor port x 10; Pin port (sensor or motor driver or adapter) x6	Power Supply:	18650 battery x2

In Stock

12 in 1 RobotStorm STEAM Robot Kit

MAINBOARD

- Name: ELF
- Microchip: ATmega 328P
- Port:1 x MCU port (ATmega 328p, ATmega2560, ESP32)
  4 x RJ11 (connect to RJ11 sensor and modules)
  2 x DC motor port
  6 x pin conversion port (4 of which can be stepper/encoder/dc motor port)
  1 x USB port
  1 x Communication port (Bluetooth 2.4G)
- Electronics:
  1 x Buzzer
  1 x On-board button
  1 x On-board RGB LED

POWER

- Power supply: 2 x 18650 Lithium battery

SENSOR & MOTOR

1 x RGB ultrasonic sensor V1.0
1 x Double-way line-following sensor V1
1 x Gyroscope sensor
1 x limit switch module
1 x Light sensor
1 x Sound sensor
1 x IR receiver
1 x RGB LED -8(pins)
2 x Encoder/DC motor driver
1 x IR remote control
1 x Bluetooth 4.1 module
1 x Bluetooth Dongle module
2 x Encoder DC Motor-25 9V188RPM
1 x DC Motor-25 (50RPM)
1 x N20 DC motor (in robot gripper)

PACKAGE

- Measurement: 437 x 320 x 200 mm
- G. W.: 3500 g

Starter Maker Space Kit

STARTER MAKER SPACE KIT SPECIFICATIONS

- Mainboard : ELF mini
- Microchip : Atmega328P
- User: 3-4 students/kit

PRODUCT FEATURES

- Rich in parts
- Case diversity
- Convenient storage
- Wonderful course

AI Starter Kit

- Name: ELF mini V3.0
- Microchip: Atmega 328P
- Operation Voltage: 6-9V
- Port: 4 x RJ11 (connect to RJ11 sensor and modules)
  2 x DC motor port
  1 x Communication Port (Bluetooth)
- Electronics: 1 x Sound Sensor
  1 x Light Sensor
  1 x Buzzer
  1 x IR Receiver
  2 x Yellow LED
  2 x Red LED
- Power Indicator: 4 x Blue LED

AI Machine Learning Advanced Add-on Pack

- Add on sensors and modules

4WD Mecanum Chassis Robot Education Kit for micro:bit/mPython board

Specifications

Mainboard:	ELF Shield for micro:bit/mPython board	User:	Entry-level (8+)
External Electronics:	RGB ultrasonic sensor	Wiring Port:	1x Controller slot
	Double-way line-following sensor		4x RJ11 port
	IR avoid sensor		4x DC motor port
	Water sensor (raindrop)		2x Servo motor port
	Touch sensor		1x MicroUSB charging port
	Temperature and humidity sensor	Onbard Electronics:	1x IR Receiver
	Combustible Gas MQ2 Sensor		1x 18650 Lithium battery
	4-digit LED display	Motor:	4x Motor
	Joystick	Software:	WeeeCode (Scratch + Python)
	Potentiometer	Curriculum:	11 robot forms, 16 chapter (90 mins/chapter)
Operation Voltage:	3.7-4.2V	Size:	130x170x106 mm

AI Machine Learning Ultimate Add-on Pack

- Add on sensors and modules

4WD micro:bit V2/mPython Board Mecanum Robot Car Set

- Controller: micro:bit V2 / mPython board (not included)
- Sheild specifications: 1 x controller slot, 4 x dc motor port, 2 x servo motor port, 1 x IR receiver, 1 x 18650 Lithium battery
- Motors: 2x Block compatible motor - L, 2x Block compatible motor - R
- Wheels: 4 x mecanum wheel
- Sensor: IR Avoid Sensor x1
- RJ11 Cable -20cm x1
- Micro USB Cable x1

AI Factory Robot Kit

Name	AI Factory Robot Kit	Mainboard	ELF AIOT K210
Working Voltage	6-12V	Curriculum	8 Lessons
Onboard Electronics:	1 x 2.4inch TFT Display	Wheel	56T Plastic Gear
	1 x 180° Turnable 2MP Camera		Track Pack
	1 x Microphone	Motor	25 DC Motor, MG995 Servo
	1 x Speaker	Battery	18650 Lithium Battery Pack
	1 x On-board button	Software	WeeeCode (Scratch & microPython)
	1 x Boot/Reset Button		MaixPy (microPython)
	1 x 3.3V/5V Toggle Switch	Package	Plastic box
	1 x Power switch	Weight	
Electronics	RJ11 Adapter Module	Size	38 x 27 x 15 cm

Mars Rover Uno KF2510 Robot Car Kit

- Add on sensors and modules

AI Interactive Demostration wall

- Ten-Second Challenge
- Gesture Recognition
- AI Cartoon Photo Booth
- Whac-A-Mole
- Voice-Activated Weather Station AI School Light Box
- Fun Tower of Hanoi
- Flat Lightning
- Morse Code
- AI Digital Human

Advanced MakerSpace kit

Advanced Maker Space Kit is theme-oriented kit, students will learn the theory, usage, codes, and application with mechanical structures for over 40 different electronic modules in three theme projects step by step. Comply to Science, Physics, and computer science subjects.

- Logical thinking and analysis
- Programming knowledge
- Appliance of sensors and output modules
- Analyze and solve problem
- Teamwork and share
- 18 Lessons (90 mins)

Video

Mars Rover Arduino Education Robot Car Kit

Mars Rover Arduino Educational Robot Kit is a high-quality open-source Arduino robot kit with 14 fun robot car projects.

- High quality Arduino system robot DIY kit.
- Easy-wiring KF2510 ports and metal structure.
- 14 fun robot car projects.
- Graphical programming.
- 24 lessons (45 mins)
- STEAM Education

ELF AIOT K210
AI x Python Controller

ELF AIOT K210 is a powerful AI controller board for artificial intelli-gence education. This mainboard can perform artificial intelligence functions such as face recognition, voice recognition, size recognition, shape recognition, number detection, color recognition, machine learning, etc.
Supports Python programming and graphical programming, suitable for both beginners and professional users.
Gift: Type-C cable, microSD card, microSD card reader

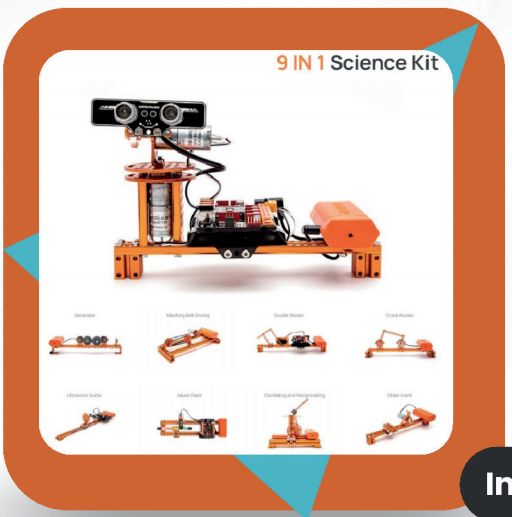
AI MACHINE LEARNING
Educational Starter Kit

AI machine learning starter kit is a 2 in 1 entry-level DIY robot kit for students to develop hands-on skill in artificial intelligence. This kit uses ELF AIoT K210 mainboard as the controller, introduced AI knowledge focusing on machine vision and machine hearing such as face recognition, vision line-tracking algorithm, object recognition algorithm etc by user-friendly graphical programming as well as professional Python programming.
At the same time, it also offers engineering knowledge such as the 4-wheel drive structure, mecanum wheel installation and usage, and so on.

9 IN 1 Science Kit

The 9 in 1 Science Kit is an educational robot DIY kit which can simultaneously build at least 9 classic STEAM application cases.
Each structure is cleverly designed, simple and compact, and is closely integrated with the school's internal science and physics classes to stimulate students' scientific interest. It is consist of aluminum mechanical parts, electronic modules, motors, hardware, tools, and storage solution. Designed for mechanical engineering education.



In Stock

EaglesCore AIoT Handle

EaglesCore is an AI x IoT handle as well as a robot controller. It is applicable to multiple teaching scenarios such as school classroom teaching, community teaching, online/offline training for STEAM, coding, robotics, AI, IoT education, etc.

- Gamepad-like AIOT development board
- Five LEDs, colorful LCD display, onboard microphone and speaker, offer audio-video interaction in STEAM education.
- Graphical programming and Python
- 32 story-line lessons, lead students programming with adventures in ocean and in outer space.

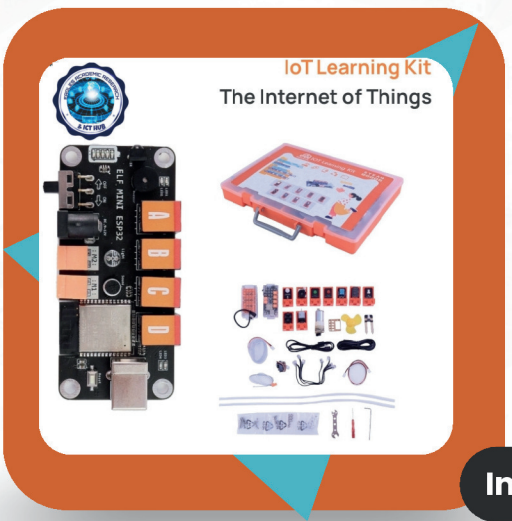
AI FACTORY ROBOT KIT
AI x Industry 4.0

AI Factory Robot Kit is a project-based demostration robot kit for AI image recognition education. This kit uses ELF AIOT K210 main board as the controlle , includes three projects, the AI factory gate, the warehouse robot, and the AI sorting robot. This robot kit simulates the common scenes of AI factories. By assembly, program and control, students get hands-on experience on programming, robotics, and industry 4.0.

IoT Learning Kit
The Internet of Things

IoT Learning Kit is a kit to learn the Internet of Things. The purpose is to let students get hands-on experience on creating with magical Internet of Things technology.
Connect the various electronic sensors or output execution modules to achieve the life scene of the Smart IoT by connecting the living scenario.



In Stock

Our Green World - Python Learning Kit (AB)

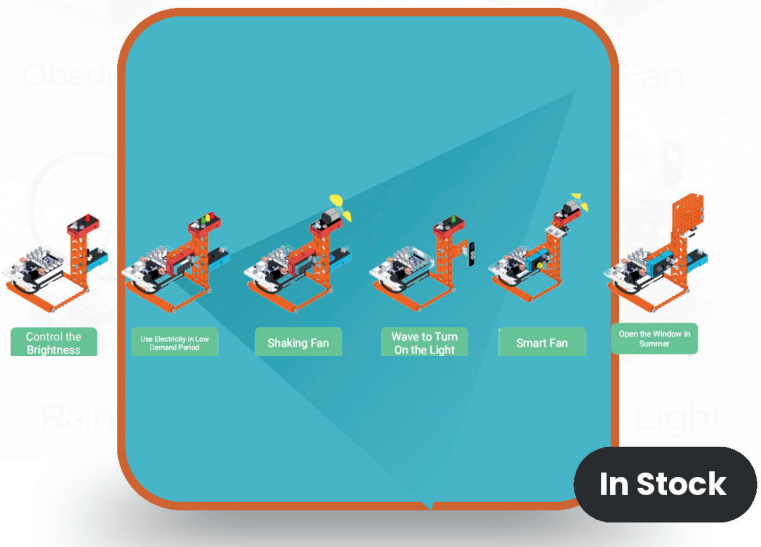
- Mainboard: ELF ESP32
- Chip: ESP32
- Serial chip: CH340C
- Input Voltage: 6-10V
- Operating Voltage: 3.3V
- Operating Current: Max. 1A
- Motor Current: Max. 1.5A
- On-board Electronics: LED x1, DC motor port x2, Power swtich x1, Reset button x1, 3P2510 port x8, 4P2510 port x5,
- External Sensor: Buzzer x1, Sound sensor x1, Button x1,LED-red x1, LED-yellow x1, LED-green x1, Light sensor, 4 digit LED display (LED segment display) x 1, Potentiometer x1, Traffic light module x1, Active Buzzer x1, Temperature and humidity sensor x1, Line-following sensor x1
- Motors: 5V130 motor x1, 9g Servo motor x1
- Program Software: Scratch code(3.0), Thonny IDE，Mu Editor

MakerSpace Showcase Kit (Shelf is not included)

- Makerspace showcase kit is a parts wall solution for classrooms, maker spaces, fablabs, and training centers. It includes 270+ kinds of robot parts, including Weeemake robot controllers, AI controllers, easy-wiring electronic modules, metal mechanical parts, transmission and driving parts, hardware, motor and batteries. With a qty more than 1300 (do not contains screws, considering screws qty it will be more than 4500) and a classroom friendly design solution, this kit is both a parts display wall as part of the STEAM classroom, as well as a robot parts library for students creation and innovation.

Our Green World - Python Learning Kit (A)

- Mainboard: ELF ESP32
- Chip: ESP32
- Serial chip: CH340C
- Input Voltage: 6-10V
- Operating Voltage: 3.3V
- Operating Current: Max. 1A
- Motor Current: Max. 1.5A



AI Smart Agriculture System Display Kit

- The kit includes a ELF mainboard with an ATmega 328 chip module, speech recognition sensor, speech synthesis module, atmospheric pressure sensor, WIFI module, full-spectrum plant light, 7-inch resistive touch color screen, 12V DC safety voltage, soil humidity sensor, water-proof temperature sensor, 130 fan, water pump, and light sensor. Most electronic modules use RJ11 ports for easy plugging and playing, lowering the learning threshold. The electronic modules are all encased in plastic, compatible with Lego structures for building. The kit contains a USB cable, power supply, connecting wires, aluminum alloy metal structural components, acrylic, and a three-layer hydroponic pit.

Eagles AI Smart Home Learning Kit

- Mainboard: ELF ATmega2560
- Chip: ATmega2560
- Input Voltage: 6-12V
- Power: 8.4V Lithium Battery Pack; 8.4V Power Adapter
- Electronics: 2560 Expansion shield x1, BeeViso AI Camera (Vision sensor) x1, RGB ultrasonic sensor x1, Speech recognition sensor x1, Speech synthesis module x1, 3-axis accelerator and gyroscope sensor x1, barometer sensor x1, Water (raindrop) sensor x1, combustible gas MQ2 sensor x1, solar panel power module x1, WIFI module x1, RGB LED strip x2, 0.96-inch OLED display module x1, Water atomizer module x1, MP3 module x1, PM2.5 sensor x1, Temperature and humidity sensor x1
- Motors: 9g Servo motor x3
- Program Software: Scratch (3.0), Arduino
